

6th Annual

North American Space Summit

February 5th & 6th, 2024

*Atheneum Suites Hotel and the International Banquet & Conference Center
Greektown, Detroit, Michigan 48226*

Tomorrow's Digital Ecosystem... Today!

NASS 2024 will explore how technology innovations will guide investments in earth- and space-based technologies over the next five years. Gain insight to help you navigate a dynamic and lucrative marketplace.

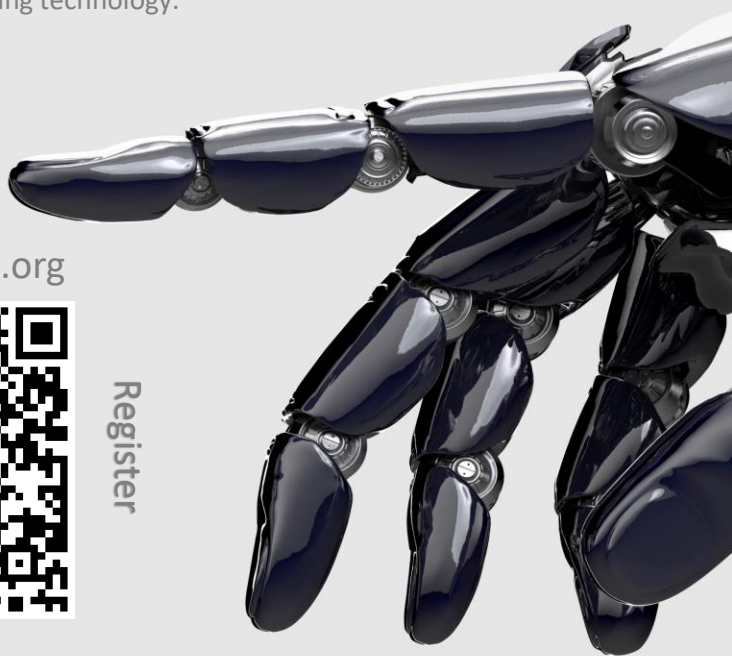

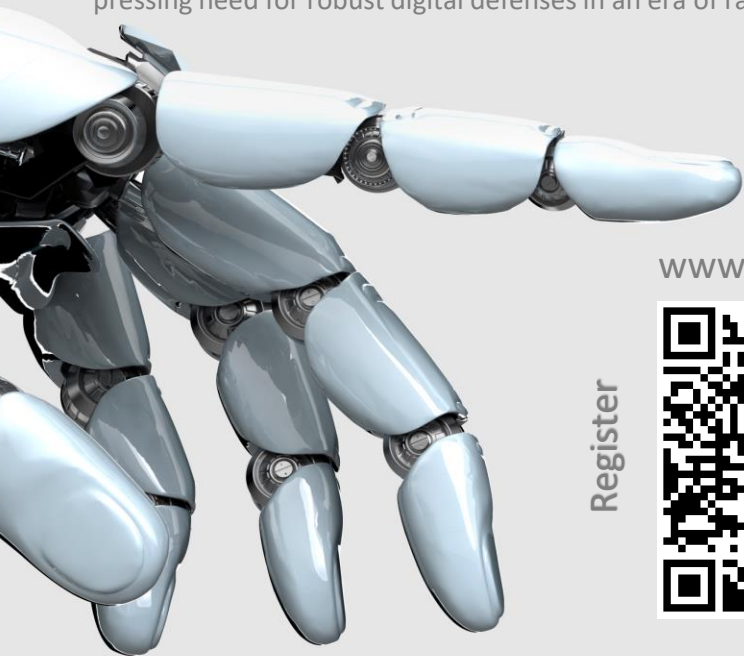

Summit Topics

Quantum Computing: Join us for an illuminating exploration of how quantum technologies are poised to revolutionize the space industry.

Artificial Intelligence: Unveil the future of the space industry with our enlightening conference session on the transformative impact of artificial intelligence (AI).

Autonomous Systems: Embark on a visionary exploration of the symbiotic relationship between autonomous systems in the automotive, air, and space industries.

Cybersecurity: Understand the paramount importance of cybersecurity in the space industry. Join us to explore the pressing need for robust digital defenses in an era of rapidly advancing technology.
